The Traveling Software Catalog

Volume 2 Number 1 $2.00

The definitive source for laptop computer software, hardware, and related accessories

Linking Laptop to Desktop

"For people who are going places"

TRAVELING SOFTWARE®

Dear Friend,

To celebrate our fifth year in business, we're putting on a new face. Part of our new look is a completeiy redesigned catalog. We hope you find it more attractive and easy to use. We are also trying to make it easier for the complete computer novice to understand and join the fabulously exciting world of laptop computing. If you have questions, problems or concerns, don't hesitate to call us at (206) 483-8088 or write us at the address below. At the same time, we have been working hard to stay on the "cutting edge" and to find and develop new and improved items for our loyal customers.

Some of the items to watch for as you go through this catalog are, • The incredible RAM/ROM BOOSTER PAK for the Tandy 100/102, • The handy Traveling SixPak, a 3½" disk wallet, • The new MacDOS Tandy portable disk drive link for the Apple Macintosh, • The world's smallest and best value battery-operated Hayes-compatible modem, • The Sardine Random House Spelling Checker on a ROM chip, • and for IBM or Macintosh owners, an unbelievable football simulation game called NFL Challenge.

As always, we guarantee your complete satisfaction. All purchases carry our 30-day unconditional satisfaction or money back guarantee.

We will notify you if there will be delays of longer than two weeks in shipping any order. Orders are usually shipped within 48 hours of our receipt, and we can ship Express overnight at additional charge if you prefer.

We hope you enjoy our catalog and we welcome your suggestions and comments. If you have any friends that should be receiving our catalogs, see the order form for a place to list their names to receive a copy.

With Best Regards,

The Traveling Software Staff

P.S. Remember, we want to hear from you – what you want, what you like or don't like. Please tell us. Our goal is your complete 100% satisfaction.

INFORMATION SERVICE

We are now managing the "laptop roundtable" on the GEnie network.

The laptop roundtable is a worldwide information exchange for laptop computer owners. Get your questions answered, schedule a trip from start to finish with American Airline EAASY SABRE personal reservations system on GEnie, learn of new applications and products (over a thousand free public domain programs for laptops). Virtually all popular laptops are supported.

With a purchase from this catalog of $50.00 or more the $18.00 signup fee will be waived. A special GEnie coupon will be included with your order.

Just follow the signup instructions and join us (TRAVSOFT), Dave Thomas (MORTIMER), and Neil Smith (NEIL. SMITH) on the laptops roundtable today.

PS: You can also reach us via the Byte Magazine "BIX" network thru the "TRAVSOFT" conference. Call for FREE BIX coupon.

TRAVELING SOFTWARE, INC. North Creek Corporate Center / 19310 North Creek Parkway / Bothell, WA 98011

Sardine *The first electronic pocket dictionary for laptop computers.*

Contains the 33,000 word Random House Pocket Dictionary. The first laptop spelling checker.

Faster than a desk top – (Processes over 13,000 dictionary words per minute!) Look up a single word in seconds or check a 25K document in less than three minutes. Corrections are inserted automatically.

Create your own auxiliary dictionary of special terms, words, names, abbreviations up to the extent of available memory.

Special on the ROM plug-in chip – Word process with the acclaimed T-word program, **plus** over 7,000 of the most frequently used business words (as determined by a two-year, one million word study of business correspondence conducted by Wang Laboratories).

Compatible – Use with the Tandy M100/102, M200 and NEC 8200/8300 laptop computers. Requires 16K RAM, Tandy/Purple computing disk drive (optional for ROM version).

Free – Your own personal copy of the Random House American pocket dictionary with every Sardine you buy.

for BOOSTER PAK, see p4-5 (w/T-Word-35,000 words)

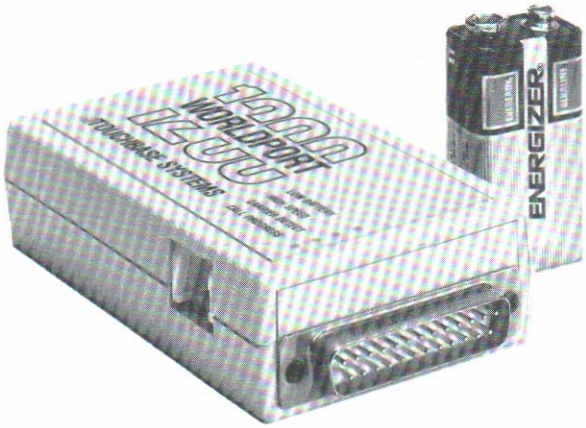
WorldPort 1200

Simple, versatile, efficient, portable 1200 baud Hayes compatible modem

Portability – Powered by its own 9 volt battery or optional AC adapter, it draws no power from your computer. The WorldPort 1200 is the smallest modem of its type available today.

Compatibility – The WorldPort 1200 works with virtually any computer with an RS-232C serial port. Transfer it from computer to computer as needed. Fully compatible with the industry standard Hayes AT Command Set including the latest extended commands. This provides access to a vast range of communications software and existing applications.

Versatility – The WorldPort 1200 meets dual communication standards allowing use throughout the world. Both U.S. accepted BELL 103/212A standards for 300 and 1200 bps and the international CCITT V.21 (300 bps) and V.22 (1200 bps) standards are supported. Both standards are switch and software selectable. In addition to the U.S. standard modular phone jack, the WorldPort 1200 features unique, optional, low cost acoustic cups allowing it to function in virtually all possible situations worldwide.



Portable Extras – The WorldPort 1200 comes complete and ready to use with comprehensive user manual, modular phone cable, adapter cable for use with acoustic cups and the 9 volt battery!

WorldPort 1200

Order # HW1-MO3 For IBM compatible computers (female DB25 connector)

Order #HW1-MO2 For Tandy M100/200 and NEC 8201/8300 Laptop Computers (male DB25 connector) List **$199.95** Special **$179.95**

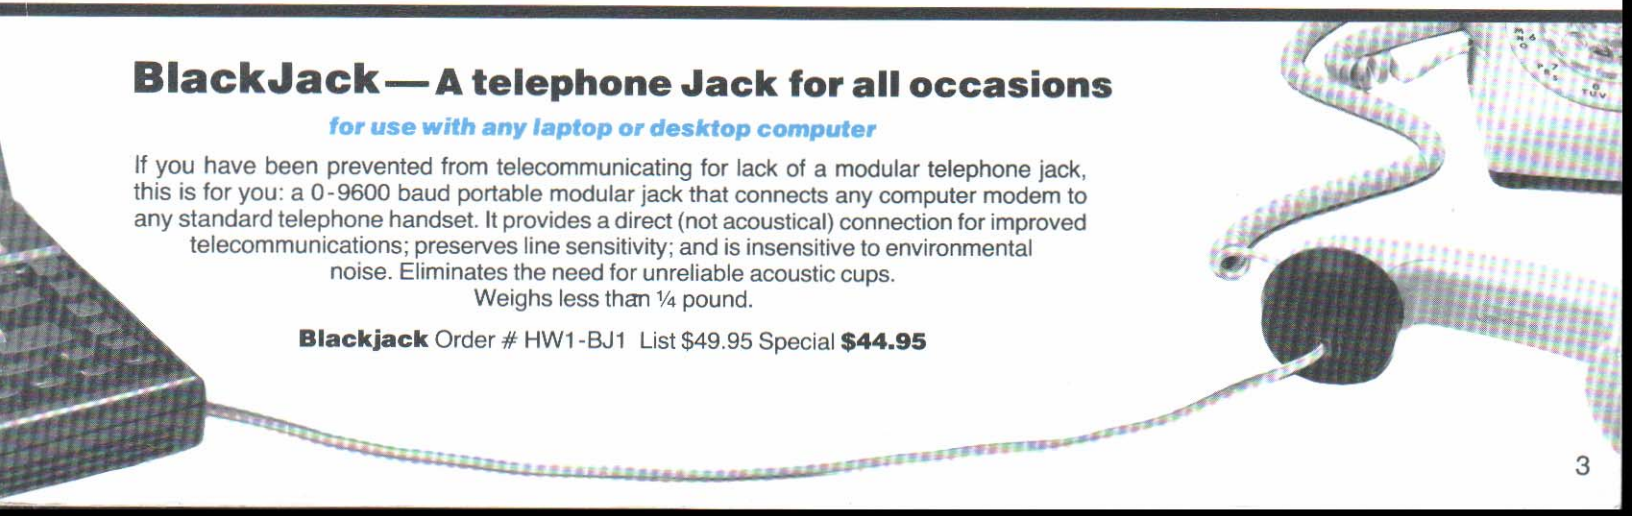
Order # HW1-M04 For Toshiba 9 pin to 25 pin Cable **$19.95**

BlackJack — A telephone Jack for all occasions

for use with any laptop or desktop computer

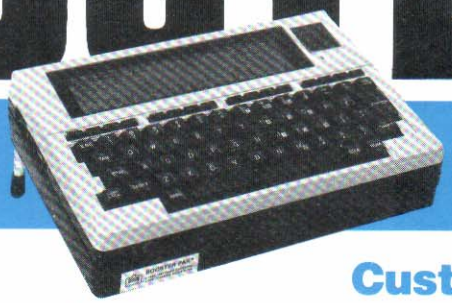
If you have been prevented from telecommunicating for lack of a modular telephone jack, this is for you: a 0-9600 baud portable modular jack that connects any computer modem to any standard telephone handset. It provides a direct (not acoustical) connection for improved telecommunications; preserves line sensitivity; and is insensitive to environmental noise. Eliminates the need for unreliable acoustic cups. Weighs less than ¼ pound.

Blackjack Order # HW1-BJ1 List $49.95 Special **$44.95**



BOOSTER PA

2 Megabytes of Memory for the Tandy Model 100/102!



An incredible breakthrough! 2 megabytes of RAM and/or ROM memory!

Includes

- 136K of RAM memory (96K available for files)
- 64K of ROM software
- 16 socketed slots for 32K RAM and/or ROM software chips
- 2 Tandy MOLEX ROM sockets
- 6 slots for 256K RAM packs for a total of 2 megabytes
- Provision for a built-in Nicad battery pak
- Provision for a built-in 1200 baud Hayes compatible modem
- Virtual RAM software built-in (no bank switching or copying)
- File folders/sub directories supported
- TS-DOS disk software built-in
- TELCOM supports file upload/downloading to virtual RAM
- Long life lithium battery for RAM backup (rated 7 years)
- BASIC programming access to virtual RAM
- ROM environment software (mix and match any ROM software)
- Ability to develop ROM software from 32-480K in size
- Fast action Asteroids game (with great graphics) built in

Customize Your BOOSTER PAK

It's a completely open system! Add more RAM, ROM software, Nicad batteries or a 1200 baud Hayes compatible "WorldPort" modem to suit your personal requirements. Choose from these available (or soon to be available) options:

- 256K RAM paks
- 32K RAM (certified low power) chips
- Internal rechargable Nicad battery pak
- IBM Desk-Link software (requires a serial cable)
- Sardine Plus word processing and spelling checker Four chip set includes complete 35,000 word Random House dictionary

Never before has so much power and convenience been packed into a 10-ounce snap-on addition to your Tandy Model 100 or102. Just snap on the BOOSTER PAK (you don't even need a screwdriver) and plug in two cables and you are in business with a 2 megabyte computer that weighs under five pounds and runs on batteries.

More details on BOOSTER PAK and its accessories:

BOOSTER PAK

The basic BOOSTER PAK has 11 open slots for either RAM memory or ROM software chips (12 if you remove the Asteroids game chip). There are also an additional 6 slots for 256K RAM Paks to expand the BOOSTER PAK to an unbelievable 2 megabytes!

Nicad BOOSTER PAK Battery Cartridge:

A self contained Nicad battery cartridge slips into the BOOSTER PAK and connects directly to the A/C power adapter plug. The Battery Pak delivers approximately 10 hours of usage and when the "low battery" indicator comes on, just pull the plug out of the side of your computer and you can continue to operate on the internal alkaline batteries in your computer! A convenient, built-in power reservoir. Recharge your Nicad battery cartridge with your existing A/C adapter.

BOOSTER PAK 1200 baud modem

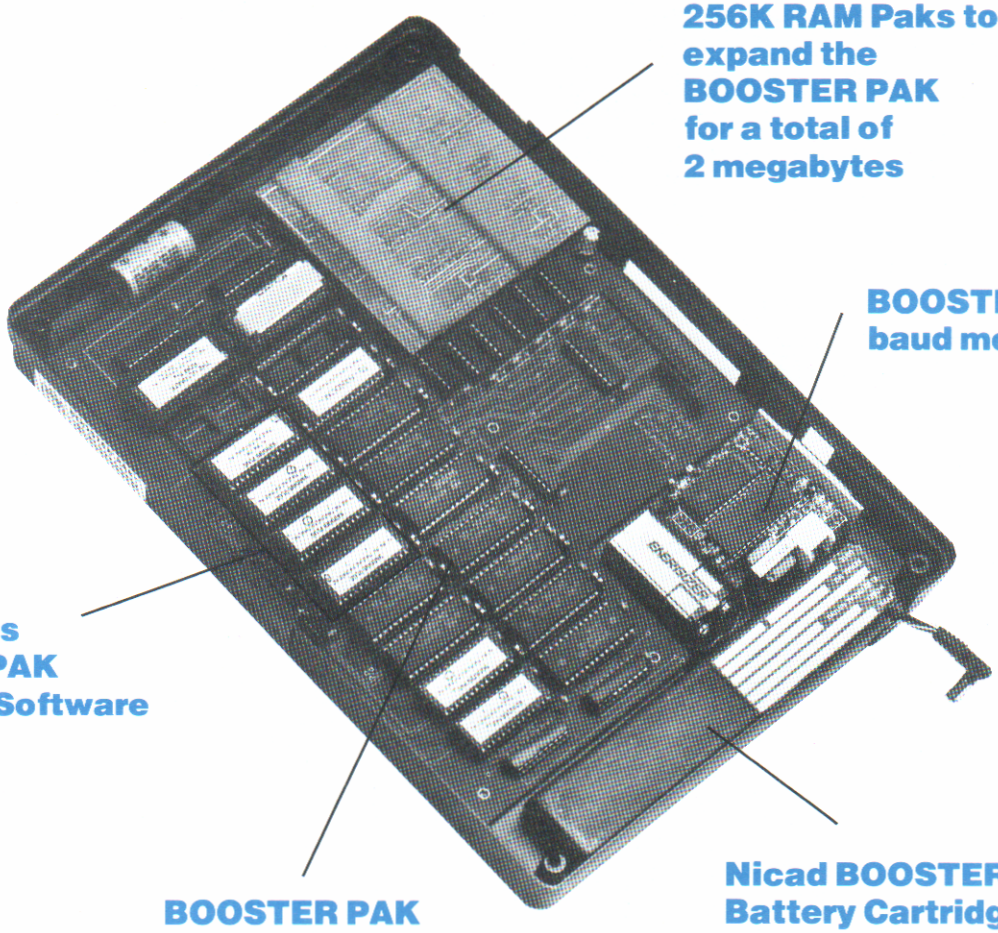
Our BOOSTER PAK modem is a special version of the popular WorldPort Hayes - compatible modem described elsewhere in this catalog. It fits neatly into the BOOSTER PAK case with a built-in standard RJ11 telephone jack. Our modem operates using the Model 100/102's existing serial port and includes its own 9 volt battery. BOOSTER PAK software allows for fast 1200 baud file downloads and uploads directly to the BOOSTER PAK's virtual memory.

IBM PC Desk-Link Software

With the potential of two megabytes of data in your Tandy 100/102, and because the Tandy portable disk drives are limited to a maximum of a 64K file size in normal use, Traveling Software set out to design a solution to the problem of moving large volumes of information into and out of the BOOSTER PAK. We have come up with two solutions:

1. TELCOM will unload and download directly to the BOOSTER PAK.

2. Our new Desk-Link software package will allow the built-in BOOSTER PAK disk software to "talk" directly to any IBM PC or compatible via a null modem serial cable connection. Our Desk-Link converts your IBM PC into a disk drive for the BOOSTER PAK! Desk-Link will also work with all versions of TS-DOS and TS-RANDOM.



Sardine Plus BOOSTER PAK Software

No longer is your Model 100/102 limited to just one ROM software chip at a time. Traveling Software has developed a special four ROM chip version of its Sardine spelling checker and word processor especially for the BOOSTER PAK. Contained on fast ROM chips is the entire Random House American Dictionary and the popular T-Word word processor. And of course, all our existing Sardine ROM customers can get credit and trade up to the Sardine Plus chip set for the BOOSTER PAK.

Since the BOOSTER PAK is such an incredible breakthrough, we anticipate that we may have difficulty keeping them in inventory, so be patient with us. All orders will be filled on a first in, first out basis. If there will be delays of over 4 weeks, we will advise you. BOOSTER PAK's will begin shipping during July, 1987.

ITEM	ORDER #	PRICE

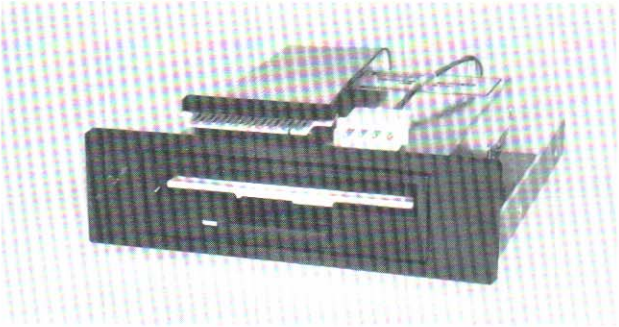
TRAVELING SOFTWARE®

High Density 3½″ Disk Drive

Supports both the 720K format for compatibility with PC laptops as well as the new high density IBM PS/2 1.44 megabyte standard! Great for backing up hard disk drives. Save time shuttling disks as well as cut the number of disks required for backup by a factor of 4:1. Works great with release 2 of LAP-LINK for hard disk backups.

Our drive is 100% SONY quality and includes mounting hardware to slip into existing 5¼″ disk slots on IBM AT's and compatible computers. Requires MS-DOS or PC-DOS 3.3 and IBM AT compatible disk controller for 1.44 megabyte format. The 72OK format is supported by DOS 3.2 and 3.3.



High Density IBM 3½″ Disk Drive	Order # HW1-DD1	**$299.95**
Drive w/LAP-LINK (w/o serial cable)	Order # HW1-DD2	**$399.95**
Box of 10 High Density 3½″ Disks (certified 1.44 megabyte)	Order # HW1-DD3	**$ 59.95**

NOTE: We anticipate a downward trend in the cost of high density disks as more supplies become available. Call for latest disk prices.

ONE KEY SERIES

Three functions, each pops up on your screen with a single key stroke while using your favorite program

Calculator—All the features of a desk-top calculator. Add, subtract, multiply, divide, find percentages right on screen without leaving your current program. Produces on screen "tape" of your calculations that you can print as you work. Make financial calculations without having to enter decimal points. Nine memories let you store your result for future use. Feed any result instantly to the cursor position in your underlying software program.

Timekeeper—On screen Alarm Clock, Calendar, Timer Set up to 9 daily alarms. Search and display any monthly calendar from 1928 to 2027. Six stop watches that can run simultaneously, track billing time, time phone calls. Display Timekeeper while running other software and feed date and time to cursor position.

Memo Pad—A mini word processor in a window. Write, organize, file text whenever an idea strikes. Write notes, memos, insert time and date then jump back into your main program. Later you can retrieve, edit, save and print or load them into your word processor for further development.

Notebook Computer Carrying Bag

This dark brown, padded carrying bag is sturdy enough and just the right size to hold your laptop computer as well as a TTXpress printer or a portable disk drive, a WorldPort modem, and an AC adapter. It has two inside pockets, a zipper outside pocket, and an adjustable shoulder strap. Popular with laptop computer users on the go!

Notebook Computer Carrying Bag
Order # HW1-CB1
$19.95

Ideal for Tandy 100/102/200 and NEC 8201/8300 laptop owners

Laptop Attache

More than just a carrying bag for your laptop computer. Our Laptop Attache is a complete soft sided briefcase with a pocket for just about everything including your computer and battery charger. And it's constructed of coated-nylon pack cloth, foam-backed in all the right places, to safeguard all contents.

The main compartment has three dividers, ideal for your computer, power supply, and work papers or portfolio. Tri-level pockets are on the outside, including one with a snap flap, are great for notepads, calculator, pens, or even 3½″ disks. A unique weatherproof flap covers all. Includes carrying handles and a removeable shoulder strap.

Laptop Attache measures 13″ × 15″ and is available in red with black trim or solid black. Works great with NEC Multispeed, Toshiba 1100, and Zenith 181 or 183.

Indicate choice of color

Special Bonus: As an introductory offer, all Laptop Attache orders will receive a FREE matching clip-on sun glass or eyeglass case.

Laptop Attache Bag Order # HW1-CB2 **$49.95**

WORD FINDER

220,000 synonyms for 15,000 words.

Compiled by Dr. Roger C. Schlobin, Professor of English Literature at Purdue University.

Contemporary Vocabulary—designed for today's writers and business people.

Confirms both meaning and spelling

Fast—The entire cycle of search and replacement takes seconds, allowing you to retain your train of thought.

Precise—Allows you to compare similar synonyms and select the exact one that expresses your thought completely and exactly.

Easy—Place your cursor on the word you want a substitute for and up pops a window with a list of similar words. Place the cursor on the word you want and press the return key. The new word replaces the old one instantly, right in your text, retaining exact capitalization and punctuation. Never lift your hands from the keyboard or your eyes from the screen.

Satisfied Customers

"Your Word Finder has changed my life! I never used to use a thesaurus . . .The speed is incredible, the wit of its arrangements marvelous. Congratulations."

William F. Buckley, Jr.

". . .Word Finder, a synonym program that blows away its opposition. It's fast. I mean really fast; and it has an enormous vocabulary. If you are looking for a thesaurus program, this is the one to get."

Jerry Pournelle, Byte Magazine

"I am genuinely amazed with this program, its speed, its ease of use, and its huge vocabulary. Word Finder is, by far, the best thesaurus program now available."

Peter A. McWilliams

"Its performance was astounding. Of all the thesaurus programs currently available, Word Finder is the best of the bunch."

Hillel Segal, Denver Post

Word Finder works with virtually all IBM PC word processors.

Our version includes **both** 5¼" and 3½" disks. A great addition to any writer's working tools.

SARDINE + ROM Pack

Another amazing breakthru only available thru the Traveling Software catalog. This slim-design 8-chip ROM pack is approximately ½ inch thick and 2½" wide. Attaches directly under the Model 100, 102, 200 or NEC 8201/8300. Only one connection is required to the existing ROM socket.

What is even more amazing is that switching from one ROM software chip to another is done all by software—absolutely no mechanical switches! That's right, no switches and no more frustrating "cold starts" of your computer.

Not only do you get four empty Tandy MOLEX ROM sockets to plug in your favorite ROM software, but we have filled the remaining four sockets with a special four chip set of Sardine. This version of Sardine is the same available for the BOOSTER PAK (see page 4) and not only includes the popular T-Word word processor, but the Sardine proof reader and spelling checker along with the ENTIRE Random House American dictionary contained completely on ROM chips! We even supplemented the Random House dictionary with special word lists from WANG Laboratories. Over 35,000 words in all. And blazingly fast!

All this for what you used to pay for a bulky, empty, mechanically switched ROM pack. Our Sardine Plus ROM software is available for the BOOSTER PAK for only $199.95. Buy it with the 8 ROM pack for only $299.

Tandy Model 100 8 ROM pack w/Sardine Plus
Order # RS1-SD4
$299.00

Tandy Model 102 8 ROM pack w/Sardine Plus

$299.00

Tandy Model 200 8 ROM pack w/Sardine Plus
Order # RS3-SD3
$299.00

NEC 8201/8300 8 ROM pack w/Sardine Plus
Order # NE1-SD3
$299.00

NOTE: existing Sardine ROM owners may upgrade for $129.00 and owners of the Sardine DISK version for $198.00. Call for details. Upgrades are also possible for the M100/102 BOOSTER PAK version.

Books to Compute By

- **Exploring the Radio Shack Model 100** *by Marvin C. Mallon*

One of the best books ever written about the Model 100. Covers everything from communications to the bar code reader option. This book is written in English, not programming jargon. A good way to quickly become familiar with the Model 100. If you are looking for really in-depth technical programming details, you will probably want "Inside the Model 100"(see below).

Order # HW1-BK1 ..... **$16.95**

- **Exploring the NEC PC – 8201** *by Marvin C. Mallon*

A very thorough review, in moderate depth, of all the capabilities of the NEC PC-8201 laptop computer. Also provides a summary of the 14 free programs that come on cassette with the NEC PC-8201.

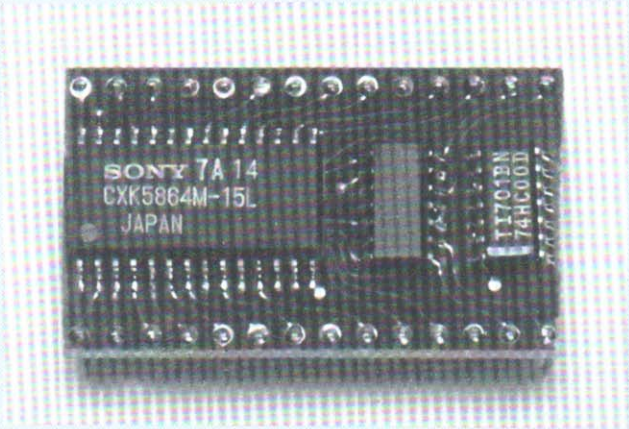
Order # HW1-BK2 ..... **$14.95**

- **Inside the Model 100** *by Carl Oppedahl*

In-depth technical review of the Tandy Model 100 hardware design and built-in ROM software. A good background for assembly language programming on the M100.

Order # HW1-BK3 ..... **$19.95**

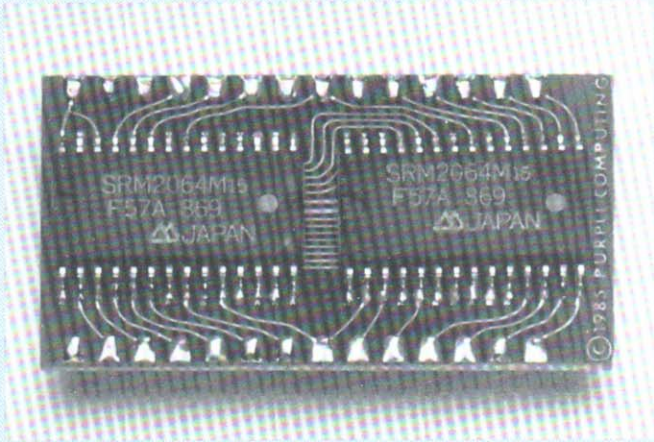
Memory Expansion Chips



• 8K Memory Chip for the Tandy 100, 102 and NEC PC-8201.

Easily installed in the RAM expansion sockets of these computers, expanding memory by 8,192 bytes per chip. Install enough chips to bring your Tandy 100 or Olivetti M10 up to 32K or your NEC PC-8201 up to 64K (32K per bank). In operation, uses little power, for long battery life. Two-year warranty.

8K RAM Chips-M100	Order # HW1-RC1	**$22.00 ea.**
M102	Order # HW2-RC1	**$14.95 ea.**
NEC	Order # HW1-NE1	**$22.00 ea.**



• 24K Memory Chip for the Tandy 200

Installs in the Tandy 200 in less than two minutes – the only tool necessary being a coin to pop open the hatch. Install up to two of these chips to bring the Tandy 200 to 72K. Low power requirements, for long battery life. Pins made especially for the Tandy 200 expansion compartment. Two-year warranty.

24K RAM Chip M200 Order # HW1-RC4 . . . . . **$65.00**

• 128K RAM SideCar . . . . . .for the NEC PC-8201/8300

Attach to the expansion slot on the left side of your NEC PC-8201/8300, and add four banks of 32K RAM – for a total of 192K when combined with 64K of internal memory. Designed to conform to the shape of the computer and operates off two standard AA batteries for five to seven years. Select banks by a switch on the top of the case. Manufactured by Purple Computing, Inc., to strict government standards – a bargain for those needing lots of portable memory.

NEC 128K SideCar Order # HW1-RC2 **$269.00**

TRAVELING SOFTWARE®

The definitive source for laptop computer hardware, software and accessories

TS-DOS

TS-DOS is a complete operating system for the Tandy and Purple Computing portable 3½" disk drives. Install TS-DOS in your laptop computer, and you can list files both on disk and in RAM; then save to disk, load into RAM, kill, and rename files simply by selecting a file with the bar cursor and pressing a function key. A small portion of TS-DOS can be made RAM-resident, allowing you to save and load TEXT files to and from disk directly from TEXT (from the main menu of the NEC) and write BASIC programs that directly access disk files. It also lets you format disks, preview a file directly from disk, append files on disk to create a single file of up to 64K – even backup the entire contents of a RAM bank at once.

TS-DOS with Tagging (for the Tandy 100/102/200, NEC PC-8201/8300)—The Tag feature lets you load, save, or kill several files at once – at a substantial savings in time. You can select certain files for tagging – or you can tag all files. You can even remove tags – one at a time or all at once. TS-DOS occupies 5.5K of high memory (2.7K for the resident portion).

"TS-DOS is much preferable to the Tandy operating system . . . .I recommend TS-DOS highly." 80 Micro Magazine

Tandy 200K Disk w/TS-DOS-M100/102	RS1-PD1	**$249.00** *	TS-DOS-M100/102	RS1-TS1	**$ 69.95**

Tandy 200K Disk w/TS-DOS-NEC	NE1-PD1	**$249.00** *	TS-DOS-NEC	NE1-TS1	**$ 69.95**

*(Includes FREE 6-pack disk wallet with all disk drives)

TS-RANDOM—

Gives you rapid access to many laptop files at once!

Features

Retrieve information much faster than sequential-access methods. TS-RANDOM is built into your computer's BASIC language. Up to eight files are supported for simultaneous access for input and output. A sample BASIC program is included that you can modify according to your own applications.

Load, save or kill several files at once – saving you time and energy. Select special files for tagging or tag all at once. Ideal for loading or saving entire banks of memory on a file-by-file basis.

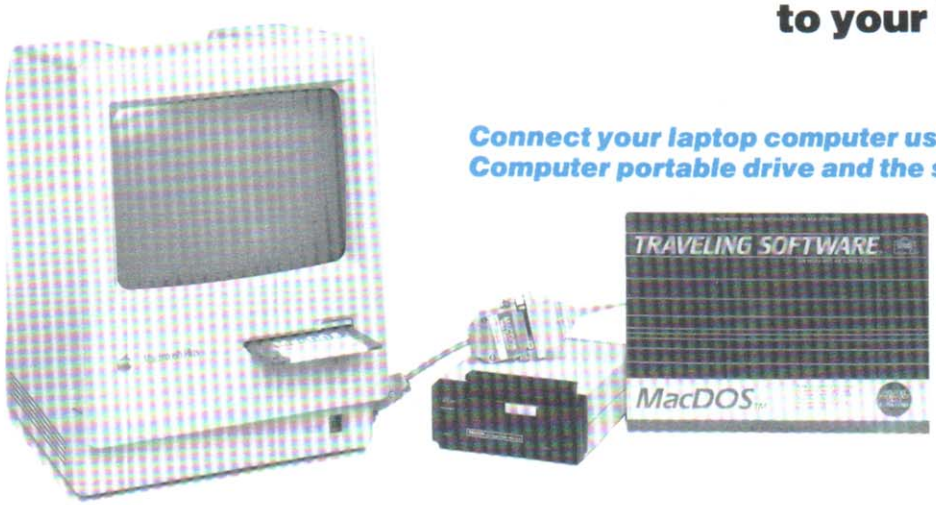
Recover disks and make quick copies with TS-RANDOM. Special utilities for recovering erased or damaged disk files and quick disk copying are included with TS-RANDOM.

Available on a Plug-in ROM as well as a disk. The ROM chip occupies very little RAM memory and includes both RAM recovery and Lapcoder TEXT compression options. Press one key and any text file is compressed up to 50%. Store the equivalent of 150K of TEXT on a 100K disk or, 48K of TEXT in a 32K RAM bank.

TS-Random-Disk-M100/102	RS1-E1	**$ 89.95**	TS-Random-ROM-M100/102	RS1-RA2	**$119.00**
TS-Random-Disk-M200	RS3-RA1	**$ 89.95**	TS-Random-ROM-M200	RS3-RA2	**$119.00**
TS-Random-Disk-NEC	NE1-RA1	**$ 89.95**	TS-Random-ROM-NEC	NE1-RA2	**$119.00**

IMPORTANT: TS-Random is only available for 100K format disk drives.

MacDOS— Connects your Macintosh to your Laptop computer.



Connect your laptop computer using your Tandy or Purple Computer portable drive and the special MacDOS adapter cable.*

MacDOS
Order # AP1-MD1
$94.95
including cable adapter

Manage Your Data

With MacDOS your Macintosh can read and edit files created with your laptop. Open, edit and print files on the portable drive as easily as regular Macintosh files. Copy all of your files from the portable drive to the Macintosh for easy backups.

Easy To Use

MacDOS gives you access to the data you want when you want it.

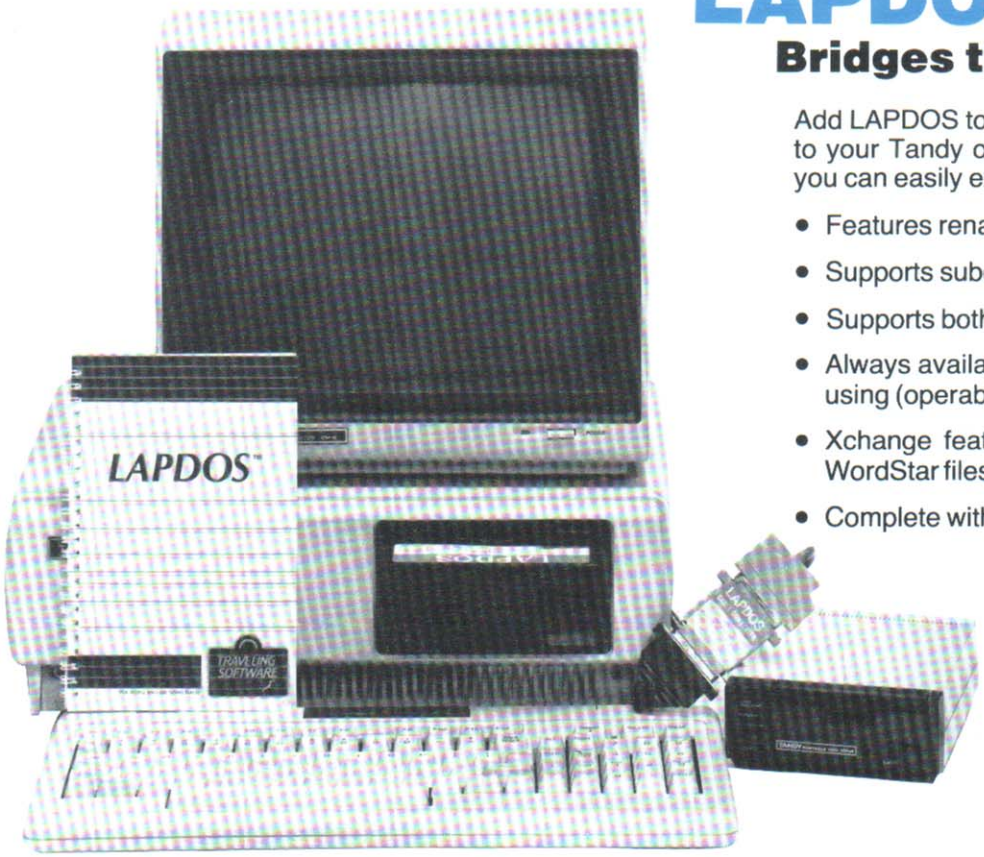
Features

- Full editing capabilities for files less than 32K in size.
- Up to 4 file windows open at a time.
- Catalog window shows files on the portable drive.
- Copy all function for quick file transfers
- Supports both Tandy 100K and new 200K disk formats.

* Macintosh Plus owners will need the Mini-8 to DB9 connector cable to use MacDOS.

LAPDOS *the IBM Connection*

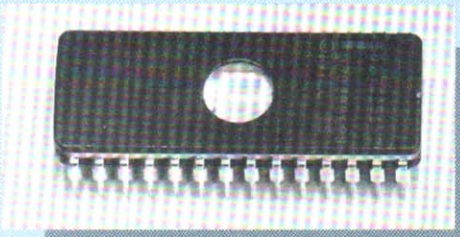
Bridges the desktop/laptop gap.



Add LAPDOS to your IBM desktop computer, then connect it to your Tandy or Purple Computing portable disk drive and you can easily exchange desktop and laptop files.

- Features rename, view and delete functions.
- Supports subdirectories on desktop computers.
- Supports both Tandy 100K and new 200K disk formats.
- Always available no matter what desktop program you are using (operable in background).
- Xchange feature to exchange ThinkTank, SideKick and WordStar files with those from IDEA! and other programs.
- Complete with cable adapter for the RS-232C serial port.

LAPDOS
Order # PC1-LD1
$89.95 includes cable adapter



Custom ROMs

Have your own programs on a plug-in ROM chip.

Send us your programs on a disk and our engineers will convert them into a plug-in ROM chip. For orders of 50 or more custom ROM's combine TS-DOS, T-Word, IDEA! or T-base with your programs on a single chip. Build your own "ultimate ROM" by combining any Traveling Software product with your custom applications.

FEATURES

Proven Technology Thousands of custom ROM's have been installed since early 1985.

Experience Traveling Software has years of experience with laptop computers and ROM technologies.

Economical Solutions to many applications as low as $49.00 per custom ROM.

Re-Use Program changes can be "reburned" into existing chips without replacing costly CMOS ROM chips.

Custom ROM's are now available for the new IBM compatible NEC multispeed laptop computer. – Also large custom ROM applications are now possible, up to 480K in size, with the Model 100/102 BOOSTER PAK (See page 4-5).

Looking for a Tandy Model 102 or NEC PC 8300 laptop to go with your custom ROM's? Traveling Software is now an authorized distributor. Take care of all of your laptop computing needs with just one purchase order. Phone for your free ROM information kit.

A few current custom ROM customers:

Associated Press, McDonald's Corporation, Swiss News Agency, Matrix Instruments, Inc., Professional Growth Associates, Biolabs Inc., Shell Pipeline Co., Del Mar Avionics, Business Systems Design Inc., Ocean State Scale, Pruett Industries, Specialty Instruments.

"Absolutely Fantastic! Since we began using custom ROM's we have installed over 500 systems in less than nine months."

Tom Villars, Project Manager
Enterprise Systems, Inc.

Normal service 7 – 10 working days. Rush service of 24 – 48 hours is possible.

CUSTOM ROM SERVICE

POWER CELL — *Up to 40 Hours between charges!*

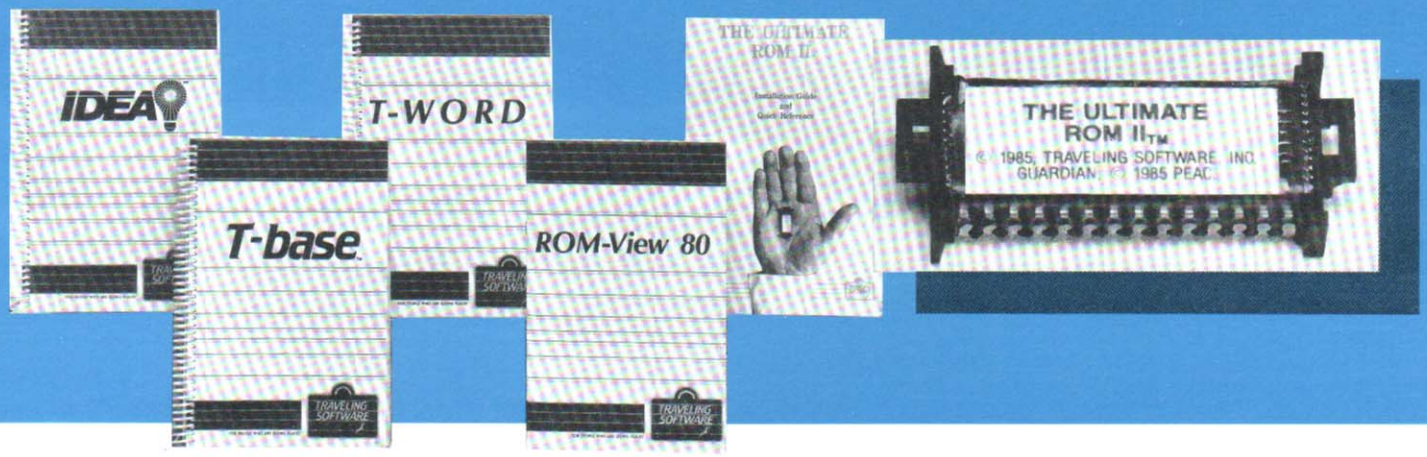
For portable disk drives and laptop computers including the Tandy Model 100/102, and NEC 8201/8300

Features

- Far superior performance to "quick drop" Ni-cad batteries
- Lightweight (20 oz.)
- Compact (4½″ × 2¾″ × 1½″)
- Charge overnight on existing A/C adapter
- Up to 8 years of recharging possible
- Power computer and disk drive at the same time
- Exceptional power – buy two and "jump start your Volkswagen"

Power Cell Order # HW1-PP1 **$79.95**

The ultimate ROM II



Five applications on one chip!

Traveling Software has pushed the boundaries even farther out! Five applications that occupy only one file on your laptop computer! (Tandy 100/102/200, and the NEC PC-8201/8300)

ROM-View 80 – Create your own basic programs with 80-column display.

Increase display one third to one half, up to 60 characters per line, 80 with scrolling.

Use in TEXT, TELCOM, BASIC and Ultimate Rom II applications.

Note: TS-DOS will be substituted on the Tandy 200 version.

T-Word – Create and review documents before printing.

Search and replace, overwrite, word count, hanging indentation, headers and footers, conditional paging, right justification. Fast text formatting by menu or control codes. Preview documents three ways before printing (including pixel page plot). Merges everything from single words to complete files. Supports virtually all printers having such features as boldface, underline, condensed print.

Idea! The great flexible organizer

Anything from simple lists to complex outlines organized, re-organized, sorted, searched. Includes many database and word processing capabilities. ***New!*** Faster operation, preview mode, template-generating feature. With LAPDOS, files can be exchanged with ThinkTank files.

T-base – For the designing person

Design true relational databases. Borrow information from seven other files. Set up formulas for calculation; spreadsheet-like calculational capabilities.

New faster operation; floating decimal; calculation of sines, square roots, etc,; conditional and logical calculations; exchange files with desktop programs like dBASE II and III, R:base 5000, and WordStar MailMerge.

Portable Disk Drive Support – Print and preview direct from disk.

No need to load files into computer. With disk files, allows all of the merge operations possible with RAM files.

THE ULTIMATE ROM II

Ultimate ROM II – M100	RS1-PR2	**$229.85**
Ultimate ROM II – M200	RS3-UR2	**$229.85**
Ultimate ROM II – NEC	NE1-UR2	**$229.85**

plus packing & shipping

ROM II Users say:

"At $229.85, the Ultimate ROM II may not seem cheap, but that's really just $45.87 per program – a bargin! I find the word processing and display enhancements almost invaluable." Henry Kisor
Syndicated columnist, Chicago Sun-Times

"...add the Ultimate ROM II ...and you'd have a system good enough to be your only computer ...at least to get started with." Jerry Pournelle
Byte Magazine, July 1986

"Amazing! That's the only word I can think of to describe your Ultimate ROM II package. Never before has anything been made so small, that can do so much, for so little cost!" Pete Totaro
Carencro, LA

"The Ultimate ROM II is really great. I have started using my Model 100 again after not using it much for the last six months. A great product!" David Bunnell
Publisher, PC World Communications, Inc.

Moneyback Guarantee

Try any item for 30 days – If not completely satisfied, return the merchandise in good condition for a "no questions asked" refund.

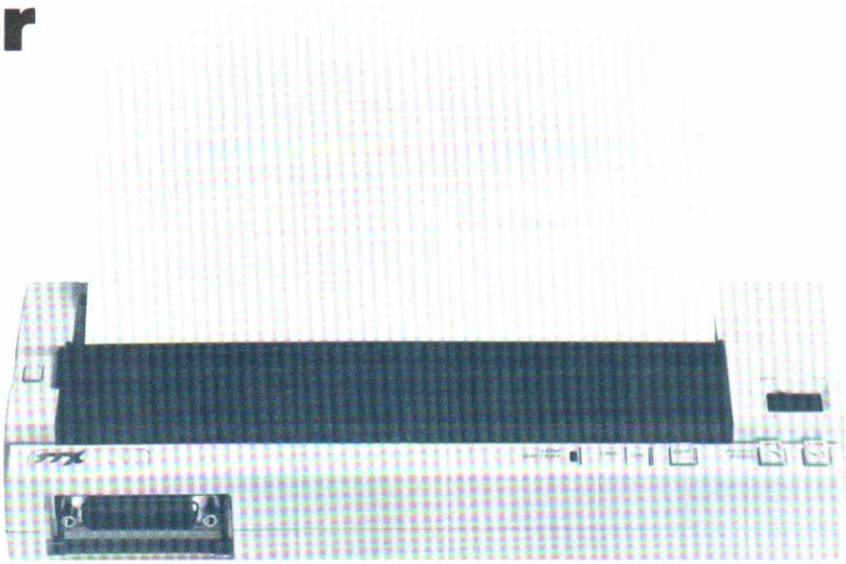
TTXpress Printer

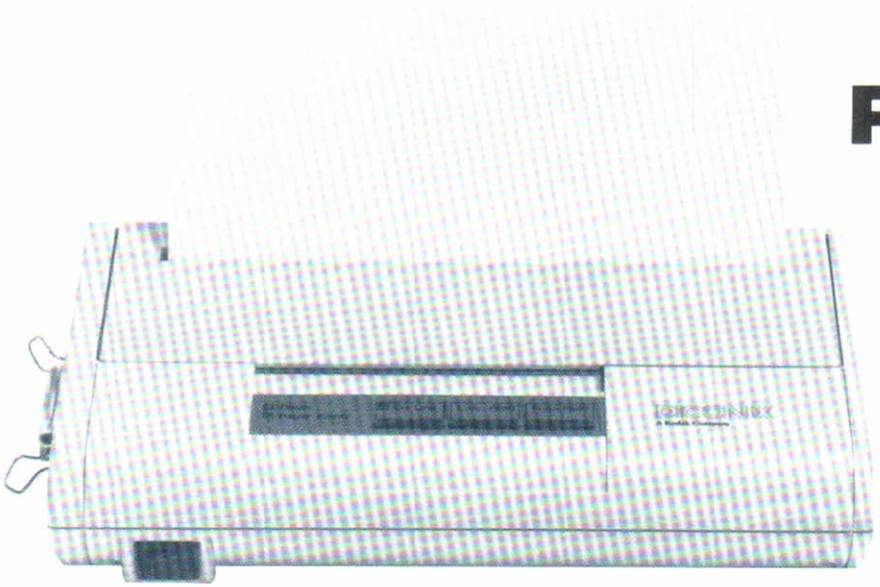
The world's smallest battery operated full-function printer.

Only 2.2 lbs. complete with batteries, measures 11″ × 4.5″ × 1.75″. With its built-in parallel interface, the TTXpress can connect to any IBM compatible desktop or laptop computer or the popular Tandy and NEC notebook computers—printer cable included! The TTXpress has fewer moving parts and greater reliability. It prints clear text (with true descenders) and graphics on either 8½″ roll or single sheet paper at 50 characters per second and 40, 80 or even 160 characters per line. Compatible with the Epson MX-80 and prints condensed, enlarged, emphasized and underline characters. Supports bit-mapped graphics. Carry the TTXpress in your briefcase or sit it on top of your home or office computer. Four C batteries, a roll of 8½″ paper and a printer cable included. You'll not find a better value anywhere! Extra roll or sheet paper and A/C adapter is available.



TTXpress Printer
Order # HW1-PR2 with IBM cable
Order # HW1-PR1 with Tandy M100/200, NEC 8201 cable
$99.00

DICONIX 150 Portable Printer



This is the best battery-operated plain paper printer made. Uses same ink jet cartridges as the Hewlett-Packard Think Jet printer does. IBM Graphics and Epson compatible. Prints in draft mode at 150 cps and in near letter quality mode at 50 cps. For best quality printing, a coated stock clay paper should be used.

Comes standard with a Centronics parallel interface. Optional serial interface is available. Includes Nicad rechargeable batteries and A/C adapter. Weighs 3.75 lbs with batteries. Measures only 2″ × 11″ × 6½″.

Diconix Printer

Lap-Link
Order # PC1-LL1
$129.95
(Including universal cable)

LAP-LINK Transfer information quickly and easily between computers.

Easy to Use

Install LAP-LINK in your computers, connect them through their serial ports by the LAP-LINK universal cable and you are ready to transfer files, directories, and entire disks. Use either computer to control the other – or to manage files on that computer alone!

Error Free

LAP-LINK will settle for nothing less than complete accuracy. If an error occurs during copying, LAP-LINK will detect it and resend the information.

Release 2

The fast, easy-to-use, error-free, and versatile way of transferring information –

- between IBM PC compatible desktop and laptop computers
- between two desktop computers (IBM PS/2 compatible)
- from one directory or drive to another on the same computer

Classic performance and new power. Now with –

- file tagging
- directory sorting
- tree-structured log feature

Versatile

Specify files for copying by moving the bar cursor, using DOS wild cards, or by tagging. Other choices: copy only files within a specific date range, send only newer copies of a file, send hidden files, require confirmation before overwriting files, display files alphabetically, or in one of four other orders.

LAP-LINK also lets you view document files on the screen, delete and rename files, use either the Com 1 or Com 2 serial port, copy files to different drives and directories on the same computer, create and remove directories. And a lot more!

Fast

LAP-LINK operates at five different speeds from 115,200 to 9,600 baud. The turbo option speeds the copy process by as much as 50%, making LAP-LINK the fastest product of its kind on the market.

TRAVELING SOFTWARE

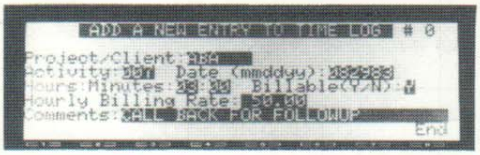
FOR PEOPLE WHO ARE GOING PLACES™

WHAT IS TRAVELING SOFTWARE?

We produce software that's specialy designed for your briefcase-size portable computer. Not adaptations of existing programs built for personal computers, but original code designed to take full advantage of the capabilities of your machine.

Our programs, the Traveling Business Manager series, will help free you from the restraints of your office. Now, you can do almost all your record keeping, correspondence, and planning while you're on the road.

Traveling Software programs were designed by people who know from personal experience what you need from your computer. The Traveling Expense Manager was designed by a CPA who worked in the field for a large corporation. A marketing representative from a major electronics firm helped us with the Traveling Sales Manager. You'll be impressed with the customized features of all our applications—and delighted at how they can help you manage your resources.



The Traveling Time Manager

This is a complete professional time accounting and billing system. You can record time expenditures for both projects and clients and categorize the time by type of activity. You can identify blocks of time as billable or non-billable, set standard activity labor rates and generate detailed reports.

This program can also help you with other applications—like keeping track of expenses, recording and listing student grades, managing equipment and machinery usage, tracking runner's miles and average time per mile, and so forth.

The Traveling Appointment Manager

This is an easy-to-use, efficient way of keeping track of all your personal and business appointments. This program takes advantage of the built-in clock and calendar in your computer to log appointments and then remind you of them on the appropriate date. The program even allows you to automatically reschedule recurring appointments. You can print out appointment pages for whatever dates or series of dates you choose.

THE TRAVELING WRITER

The Traveling Writer is a complete portable word processor. A true word processor incorporates two distinct tasks: text editing and text formatting. The **Traveling Writer** performs both of these tasks efficiently and easily.

Wouldn't you like the ability to...

- **CENTER** a line?
- set **MARGINS** and **TABS**?
- **PAGINATE** (with or without page numbers)?
- add **TITLES** to every page?
- **JUSTIFY** (left and right) a complete paragraph of text?
- include **NAMES** and **ADDRESSES** from a file, to print form letters and mailing labels?
- **SKIP** lines or **DOUBLE SPACE** without inserting blank lines?
- insert the **CURRENT DATE** (in more than one form) into a standard document without editing it?
- have **AUTOMATIC NUMBERING**, so you don't have to resequence numbers when you add or delete one?

All of these features, and more, are available with the **Traveling Writer.** Once you've tried it you'll wonder how you did portable word processing without it.

The **Traveling Writer** is just one of many equally powerful and easy-to-use products available from **Traveling Software.** We believe you will find the **Traveling Writer** will set a new price/performance standard for notebook and briefcase computer software.

THE BUSINESS MANAGER SERIES
for
TRS-80 Model 100, NEC PC-8201, and Olivetti M-10

The Business Manager Series, by Traveling Software, Inc., includes some of the most powerful, easy-to-use software tools available for notebook and briefcase sized computers.

The Business Manager products use menu selection techniques with easy-to-use formatted data input screens. The Business Manager products also use machine code input/output routines which allow for fast response times and direct information retrieval capabilities.

Our Business Manager products will help you unleash the power inside your notebook computer. You will be amazed at how easy-to-use and powerful our products are. If you have any questions concerning our products, just contact "The Traveling Professor" in care of Traveling Software, Inc. (206-367-8090).

The Traveling Project Manager

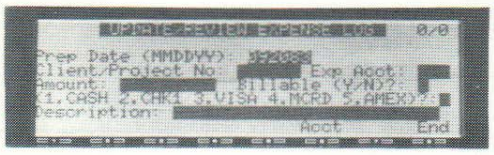
This program can help you manage large- and small-scale projects. It keeps track of work activities, personnel and dollars within categories that you define. The reports will compute budgeted and actual figures and break out expenses by work activity.

The Traveling Project Manager is especially helpful for projects that are spread out over a number of locations. If you get in the habit of entering data into your small computer as you travel, the cumulative figures will all be there for you at the end of the work period.

The Traveling Accountant

This program provides a true double-entry accounting system that you can take on the road with you. Record and process your transactions. The Accountant has several on-screen or printed report options—among them, full financial statements.

Transmit journal entries to the computer in your office with our Traveling Communicator program. No more interim calculations while you're away. The Traveling Accountant is an automated bookkeeper that can travel with you and process your entries on the spot.



The Traveling Expense Manager

Stop wrestling with your expense account funds. Let this program do all the work for you. You define expense categories and then record all your charges and designate which fund they are to be charged to. Your on-screen or printed reports from this program will show you current balances of each account, cumulative expenses, etc. by project and/or client.

Traveling Tax Manager
Tax Newsletter

June 30, 1983

INCOME TAX WITHHOLDING REDUCTION

The third and final phase of the 1981 tax rate reduction becomes effective for wages paid after June 30, 1983. The tax cut will initially be noticed by taxpayers through a reduction in the amount of federal income tax withheld from paychecks. The new withholding rates are scheduled to remain in effect and constant through December 31, 1984. After this date, the law as it is presently written requires the tax rates to be "indexed" to the cost of living. This is designed to avoid the "bracket creep" result caused by increased taxable income as a result of inflation and the progressive tax rate structure.

Examples of the withholding reduction after June 30, 1983 follows

Single Individual - Biweekly Payroll

Annual Salary	0 Allowances OLD	0 Allowances NEW	1 Allowance OLD	1 Allowance NEW	2 Allowances OLD	2 Allowances NEW
20,000 per year	143.70	133.50	136.20	123.80	124.60	114.20
[illegible]	275.50	246.90	261.10	233.80	247.00	220.70
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	328.60	298.30

The Traveling Communicator

The Traveling Communicator provides a compatible link between your office/home computer and your briefcase-size computer. This program is designed to handle all files you generate on your computer—whether they've been done on our software or not. When you collect data in the field, you can send it back to your larger computer for higher level processing.

For instance, sales or expense data that you generate on your briefcase-size computer can be formatted for use with major spreadsheet software such as Visicalc or Multiplan which reside on the computer in your home or office.

Just tell the Communicator what you want to transmit and specify the format. Then use either a phone line or direct cable to send the files.

The Traveling Tax Manager

This program is an easy-to-use tool to help you with the annual chore of preparing the dreaded 1040 form. The Tax Manager will guide you through the 1040 form line by line and will provide alternative cost saving options such as income averaging.

As a registered owner of the Traveling Tax Manager, you will receive four quarterly issues of our Traveling Tax Manager Newsletter for the year following your purchase. This newsletter is prepared for us by a tax attorney and a CPA and contains valuable update information on tax laws and issues. You can continue your subscription beyond the first year for a small fee.

T-Writer ™

T-WRITER ™ has been designed to work with text processor software found on many of the popular notebook size computers. T-WRITER ™ provides Wordstar* and Mailmerge* type print capabilities. T-WRITER ™ will transform your notebook computer into a true word processor.

Traveling Software is available for leading briefcase-size computers.

If you are considering purchasing a briefcase-size computer, ask your dealer if Traveling Software is available for it. Or, call our Consumer Support Division at (206) 367-8090.

Traveling Software is extremely easy to use. Each program is accompanied by a concise instruction manual and taped instructions from the Traveling Professor. The Traveling Professor gives a humorous, but constructive and informative lecture on the use of each program. You'll enjoy listening to him as much as we do.

FOR PEOPLE WHO ARE GOING PLACES

THE BUSINESS MANAGER SERIES

THE BUSINESS MANAGER SERIES

The Business Manager Series by Traveling Software offers eight specially designed software products for people who are going places. You can use The Business Manager modules independently or let the Traveling Communicator link your portable computer to your office or home computer systems.

THE TRAVELING TIME MANAGER

The Traveling Time Manager provides a complete professional time management and billing system. Time expenditures may be recorded for both projects and clients as well as by work activity. Hours worked may be identified as either nonbillable or billable. Standard billing rates can be automatically applied to individual work activities.

The Time Manager is also an effective way of managing the hourly usage of equipment and machinery.

THE TRAVELING SALES MANAGER

The Traveling Sales Manager is an effective tool for managing daily sales related activities. The Sales Manager keeps track of both customer and product information and provides a complete customer order entry system. The Sales Manager even offers an optional "reminder" service for follow-up customer contacts or other pending customer business.

The Traveling Sales Manager can also be used with The Traveling Communicator to transmit sales information directly from the field to your office computer system.

THE TRAVELING APPOINTMENT MANAGER

The Traveling Appointment Manager is an easy-to use tool that helps you to keep track of scheduled appointments and daily activities. Appointments may be entered by either a specific date or by a day in the week such as "the second Monday in December."

The Appointment Manager can automatically remind you before a scheduled appointment time. Missed or changed appointments are easily rescheduled.

The Appointment Manager also allows you the option to create a daily prioritized list of tasks to accomplish. Appointments or tasks pending may be viewed on the display or schedules may be printed.

THE TRAVELING EXPENSE MANAGER

The Traveling Expense Manager provides an easy way of keeping track of expenses while you are traveling. Expenses may be entered in categories that you define as well as optionally being recorded within a project or client classification.

The Expense Manager can also keep track of expenses by various sources of funds such as cash, checking accounts, or credit card accounts. Current balances or each account and cumulative expenses may be viewed on the display or optional reports may be printed.

THE BUSINESS MANAGER SERIES
for
The Radio Shack Model 100

The Business Manager Series, by Traveling Software, Inc., includes some of the most powerful, easy-to-use software tools available for notebook and briefcase sized computers.

The Business Manager products available for the Radio Shack model 100 use the most efficient combination of machine code and compressed BASIC statements possible to take full advantage of the capabilities of the model 100. The size of the Business Manager applications range between 7K and 12K and run effectively on a 16K machine (although a 24K machine is recommended to allow for greater information to be processed).

The Business Manager applications for the model 100 also use "invisible" files. This technique allows for the protection of your information from inadvertent access from the model 100 menu. It also allows for more available file locations for other programs and text information.

PRODUCT AVAILABILITY SCHEDULE *

August 1983

Product Name	Price	Scheduled Availability
The Traveling Time Manager	$59.95	Sept. '83
The Traveling Appointment Manager	$59.95	Sept. '83

THE TRAVELING TIME MANAGER

Attached is a sample printed report produced by The Traveling Time Manager. This sample report is intended to give you an idea of the type of information the Time Manager is capable of producing.

It is not necessary to have a printer to use the Time Manager since all summary and detailed information can readily be viewed on the model 100 display.

We have found some unique applications for the Time Manager among our customers. The following is a brief list of some of the applications for the Time Manager:

- Tracking billable time and expenses by client for attorneys, accountants, and consultants;
- Managing expenses by cost centers for several residential construction projects;
- Tracking the hourly usage of machinery and equipment, and
- Recording student homework, quizzes, tests, and attendance and using the average hourly billing rate to give grade averages.

The Traveling Time Manager has been designed to take full advantage of the capabilities of the Radio Shack model 100. Approximately 100 time log entries will occupy 6K of storage on the model 100. With an average of five entries per work day, 6K of storage could hold an entire month of information.

The Time Manager is just one of eight equally powerful and easy-to-use products within The Business Manager Series. We believe you will find The Business Manager Series to set a new price/performance standard for notebook and briefcase computer software.

Traveling Software is available for all leading notebook or briefcase sized computers. If you are thinking of purchasing a notebook or briefcase computer, ask your dealer if Traveling Software is available for it, or call our Consumer Support Division at: (206) 376-8090.

THE TRAVELING PROJECT MANAGER

The Traveling Project Manager is an excellent tool to use for the daily management of project resources. The Project Manager allows for budget and actual information to be managed by each of the following three classification categories:

- Work Activities;
- Individual Tasks Within a Work Activity, and;
- Detailed Expense Accounts.

Estimated completion dates for both tasks and activities can be recorded. Critical activities that may affect the overall completion schedule of a project may also be indicated.

THE TRAVELING TAX MANAGER

The Traveling Tax Manager provides an easy-to-use tool to assist in the annual chore of preparing the dreaded 1040 form. The Tax Manager will guide you through the 1040 form line by line and will provide alternative cost saving calculations such as income averaging.

As a registered owner of The Tax Manager, you will receive four quarterly tax newsletters during the year of purchase. The Traveling Tax Newsletter is prepared by a practicing tax attorney and CPA and contains valuable updates and suggestions concerning current tax issues. The Traveling Tax Manager will be updated each tax year and previous registered owners will be able to obtain updated versions at a reduced cost.

THE TRAVELING ACCOUNTANT

The Accountant can be your traveling bookkeeper providing a true double entry accounting system. The Accountant is able to record transactions generated away from your home or office and process them immediately. Journal entries that are input to The Accountant may also be transmitted using the Communicator to your office computer system.

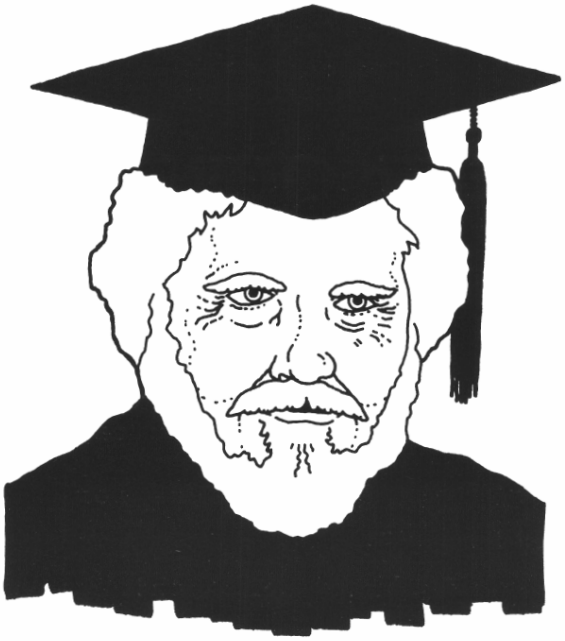
The Traveling Accountant has several different report options including the generation of complete financial statements.

THE TRAVELING COMMUNICATOR

The Traveling Communicator provides a compatible link between your office or home computer system and your notebook or briefcase computer. The Communicator is designed to work with files generated by The Traveling Business Manager Series as well as files generated by other programs.

To use The Communicator, you select the items of information that you would like to transmit to another computer, specify the format your computer is partial to, and then send your information off via a phone line or direct cable connection.

Who is The Traveling Professor?



The Traveling Professor™ claims to be the guru of portable computer software. All Traveling Software products come with a cassette tape made by The Traveling Professor explaining how to use each product.

The Professor loves mail. If you have any questions about Traveling Software, just write a note to:
